

SEALBOND ER-510

SEALBOND EPOXY REDUCER

Description: Reducer / Thinner

Sealbond Epoxy Reducer(ER-510) is designed specifically for Epoxy coatings, primers & enamels as a medium for reduction of viscosity property. It is formulated with a blend of aromatic solvents to meet higher solvency and compatibility for epoxy coating admixtures.

Properties:

Color: Clear

Red Label: Flammable, Flash below 100 °F

VOC- High

Reduction: 5-10% reduction rate is recommended base on total volume of epoxy admixture.

Use of systems:

Sealbond Epoxy Reducer have been developed and evaluated for use as a Total System Coating. This reducer is compatible with our Epoxy Primers, Enamels and Coatings. Use of any products not manufactured by Sealbond Chemical Industries Inc. as “replacement” reducers is not acceptable. Primer and Paint failures, blistering, chemical resistance, inter-coat adhesion failure, and paint gloss life issues may occur. For long-term integrity of the applied Primer or Paint Coatings use a complete Sealbond Coatings System.
