FLOOR COATING SYSTEMS

"We formulate based on your specifications"

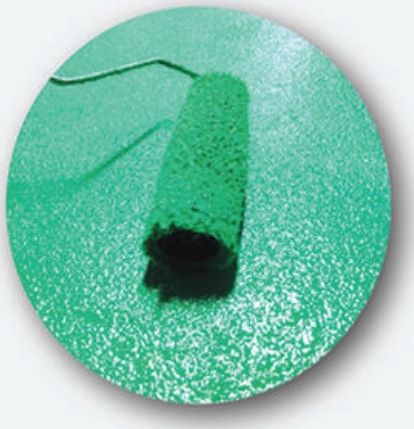
CERTIFIED:

TÜV SÜD

Low VOC

SEALBOND CHEMICAL INDUSTRIES INC.

SEALBOND
FLOOR COATING SYSTEMS



Sealbond Chemical Industries Inc. is a dynamic manufacturing and trading company specialized in the technology and formulation of specialty construction chemicals. The focus of our R&D department is to establish and to achieve industry leadership on environmental sustainability. As innovation technology driven manufacturer, Sealbond is constantly developing new systems for both new build and refurbished projects to serve and to achieve clients satisfaction.

Sealbond Chemicals produces a wide range of high performance quality floors from epoxies, chlorinated rubber-based, urethanes and heavyduty coating systems with multiple variety of colours that will guaranty to meet clients requirement.

Our floor coating system starting from sealer, primer up to the top coat comply with Volatile Organic Compounds (VOC) regulations with accordance to Green Building Council to ensure that our customers are safe and protected.

DURABLE
Superior abrasion resistance and penetration bonding structures allows long term durability

HIGH HARDNESS
Exceptional hard wearing and stronger surface hardness compare to bare concrete substrates

ECO-FRIENDLY
Eco-friendly product with no harmful substances and complies with VOC Regulations

ANTIMICROBIAL
Superior antimicrobial properties that kills and prevent growth of microorganism

EASY-TO-CLEAN
Delivers a hygienic seam-free surface that is easy to clean and maintain

RECOMMENDED USE

Manufacturing Plants, Automobile Service Centers, Equipment Plant and Warehouses
Fast curing, Heavy duty, Anti-stain, Non-skid, Non-peeling, Easy maintenance

Freezers, Chiller Rooms, Fermented Food Plant, Wet and Dry Areas
Antimicrobial, Hygienic, Fast-curing, Anti-slip, Anti-stain, Easy Maintenance

Hospitals, Infant & Elderly care facilities and Schools
Antimicrobial, Hygienic, Eco-friendly, Anti-slip, Non-skid, Anti-stain & Non-flammable

Parking Areas, Waterpark, Path-walk, Emergency Staircase
Anti-slip, Non-skid, UV-Resistance, Abrasion Resistance, Noise Reduction, Anti-stain

Sealbond's innovative and outsourced range of floor coating products will ensure you build quality, reliability for the most demanding flooring applications. All products that we manufacture complies to VOC regulations and innovated to contribute green building.

FLOORING SOLUTIONS

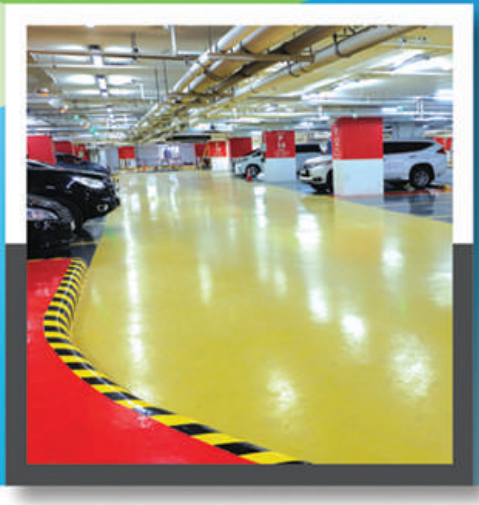
a Quality you can stand On...

SELF-LEVELING FLOORING SYSTEM

SEALBOND EFC-100 100% Solids Lead-free & Non-toxic Floors

Description

is a 100% solids two-component epoxy self-leveling compound with exceptional abrasion resistant coating and highly bond strength on properly prepared substrates such as concrete and steel.



ANTI-SLIP & NON-SKID FLOORING SYSTEM

SEALBOND EFC-80 High abrasion resistance floors

Description

is a two-component clyoaliphatic amine based formulated from carefully selected highest grade epoxy resin and curing agents. Sealbond EFC-80 with aggregates is a non-skid and anti-slip flooring system that has an excellent abrasion resistant.

INDUSTRIAL FLOOR COATING SYSTEM

SEALBOND 321 G Epoxy Flooring & Industrial Coatings

Description

is a polyamide two-component epoxy based coating designed for a general maintenance coating where gloss and color retention is desired.

ANTI-STATIC FLOORING SYSTEM

SEALBOND AS-1609 — Extremely durable floors with specialized anti-static system

Description

is a seamless electrically conductive epoxy floor coating system specifically engineered to provide excellent static control properties for concrete substrates.

ACID RESISTANCE FLOOR COATING SYSTEM

SEALBOND ACR-890 — Highly chemical resistance flooring system

Description

is a self-priming highly chemical resistant epoxy mastic coating with exceptionally versatile uses in all industries and suitable over most existing coatings and tightly adhering to rust.

RUBBER-BASED FLOOR COATING SYSTEM

SEALBOND CRB-178 — Chlorinated Rubber & Industrial Coatings

Description

is a single component chlorinated rubber base coating with excellent adhesion on properly prepared substrates, such as concrete, steel and wooden surfaces.

COLD STORAGE & WET AREA FLOORING SYSTEM

BASEKRETE MD/HD — Highly impact resistance seamless & hygienic flooring

Description

is a self-priming polyurethane screed system with extremely hard, high impact resistance mortar which exhibits excellent abrasion, wear, temperature and chemical resistance.

HEAVY DUTY FLOORING SYSTEM

SEALBOND HDF — High Hardness Epoxy Mortar System

Description

is a 100% solids epoxy combined with highest grade of aggregates which exhibits high strength heavy duty flooring with excellent abrasion and chemical resistance.

EXPOSED UV-RESISTANCE COATING SYSTEM

SEALBOND PU-108 — UV-Resistance Protective coating system

Description

is an aliphatic two-component UV Resistant high build, high solids attractive satin finish top coat with excellent resistance to acids, alkalies, solvents, salts and water.
